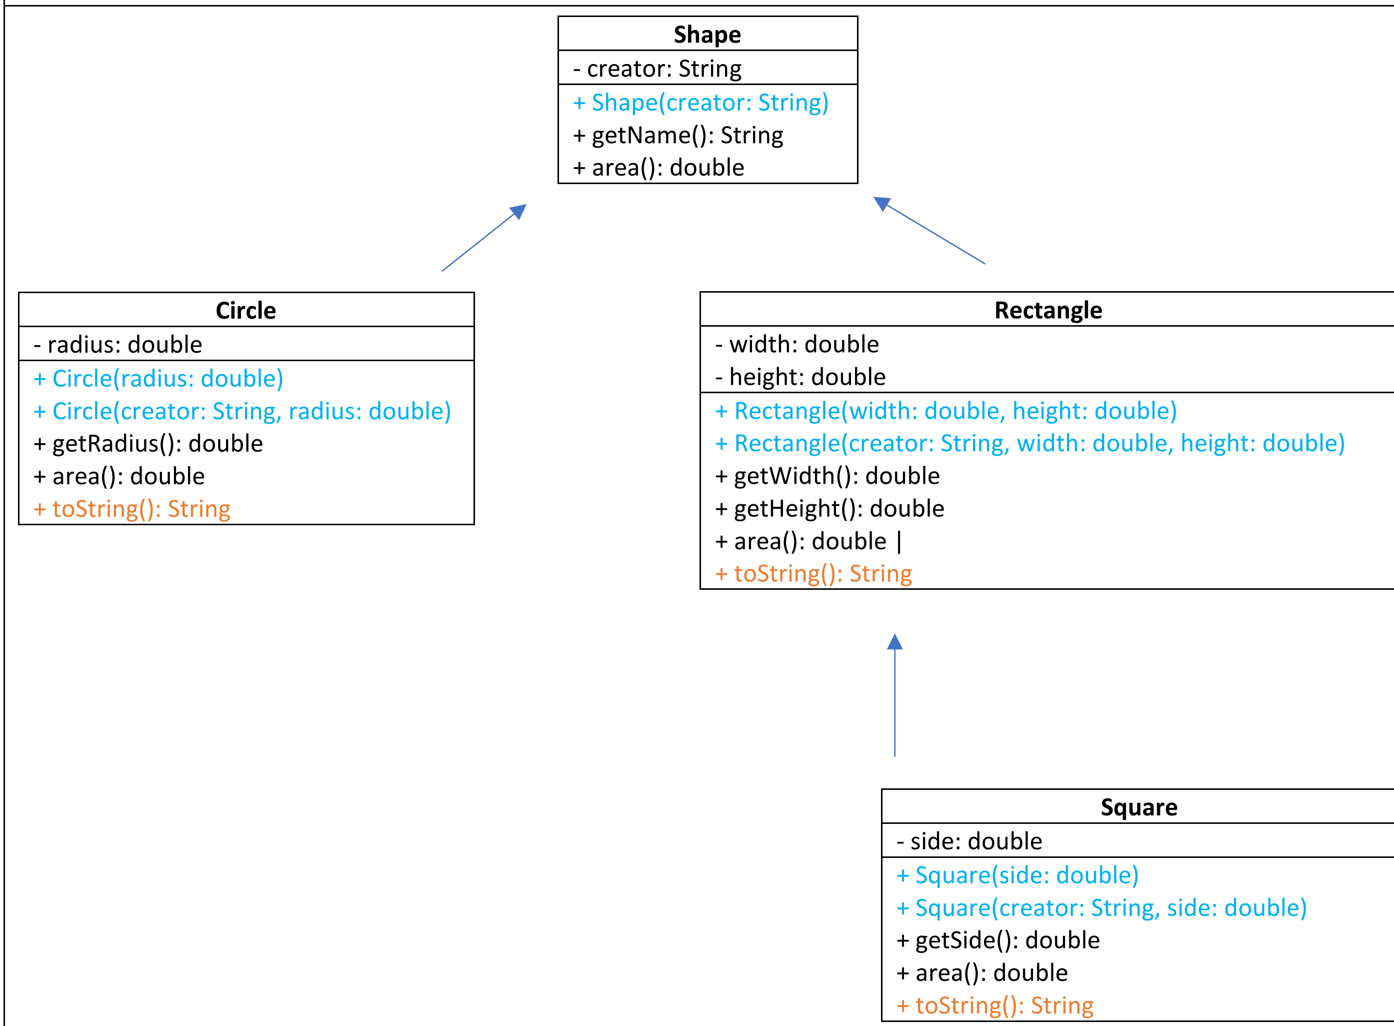
# Java2: Lesson 2 – Lab Project

1. Add **summary** at the top, **documentation** at the bottom and **comments** where necessary.
   - Recordings and interviews are an exception, but they should be included in your submission code.
2. **Cite** the source of your information.
3. Refrain from including anything **you don't fully understand**.

2 100 points

Write a program to generate an output like the sample output, which verifies the functionality of the classes.

1. Create classes based on the UML class diagram.
2. Utilize the test code snippets.
3. Submit a single file containing the test code, and all four classes.
4. Refer to the following links for more information:
   https://liveexample.pearsoncmg.com/html/SimpleGeometricObject.html
   https://liveexample.pearsoncmg.com/html/CircleFromSimpleGeometricObject.html
   https://liveexample.pearsoncmg.com/html/RectangleFromSimpleGeometricObject.html



*Test code snippet:*

```
String creator = "Your Name";
Circle circle = new Circle(creator, 10);
System.out.println(circle.toString());
System.out.println("===================================");
Rectangle rectangle = new Rectangle(creator, 5, 2);
System.out.println(rectangle.toString());
System.out.println("===================================");
```
