

Java2: Lesson 4 – Interview

1. Add **summary** at the top, **documentation** at the bottom and **comments** where necessary.
- Recordings and interviews are an exception, but they should be included in your submission code.
2. **Cite** the source of your information.
3. Refrain from including anything **you don't fully understand**.

1 100 points 5-min challenge: you will get full credit after you reproduce your work during a class or interview. Create a Dog and a Cat class by utilizing the abstract class to generate the following sample output: - Complete the Animal class for the Dog and Cat classes. - Submit a single file containing the test code, Animal class, Dog class and Cat class. - Apply your preferred coding style, including indentation and comments, for your final submission. Note: *Explain the code you are writing. *Perform two consecutive recordings for each task. *Follow the standard routine for each interview. 1. Share the entire screen (https://bit.ly/3INpkJV) 2. Use only one screen to share (Win + P > PC screen only) 3. Display the running programs (Alt + TAB) 4. Get your IDE (IntelliJ) ready 5. Presentation mode (Ctrl + ) * Editing your recordings is considered cheating and will not be tolerated.			
<pre>abstract class Animal { public abstract void makeSound(); } public class Main { public static void main(String[] args) { ... dog.makeSound(); dog.sleep(); cat.makeSound(); cat.sleep(); } }</pre>
